

SAHIL SHRESTHA

Canberra, ACT 2606 | (+61) 416 572 434 | Sahil.stha2003@gmail.com | sahilstha.vercel.app |

Summary

A technically adept, client-centric Systems & Software Engineering graduate with active, hands-on experience in the telecommunications industry at Telstra. Proven ability to bridge complex network infrastructure requirements with front-facing client advisory and team leadership. Backed by solid university training in network architectures, data communications, and systems software. Equipped with a 'can-do' attitude and strong problem-solving initiative to deploy, troubleshoot, and maintain custom telephony and SME network solutions.

Skills

- Effective communication
- Problem solving
- Attention to detail
- Team collaboration
- User Experience (UX) Focus
- Adaptability, can-do attitude
- Methodical approach
- Technical Service Consultation
- Interpersonal Skills
- Cross-Platform Adaptability

Technical Skills

- Enterprise Systems: Salesforce (User & Incident Management), ERP systems, and POS platforms.
- Asset Management: Lifecycle tracking, inventory reconciliation, and procurement coordination.
- Telecommunications & Networking (Core Network Architecture, Routing & Switching)
- Python and data modeling libraries, time series modeling (ARIMA, LSTM).
- Project Tools (Monday.com, GitHub, and full-stack documentation)
- Basic networking (TCP/IP, DNS, DHCP).
- System setup and configuration (Windows desktops and laptops).
- Hardware and peripheral troubleshooting.
- Windows OS troubleshooting.
- Technical support and troubleshooting.
- Web development: React/Tailwind CSS/ HTML/CSS, Webflow, WordPress.
- Web Debugging: Browser DevTools, UI/UX optimization, and visual troubleshooting.

Education and Academic Project

Bachelor of Software Engineering in Information Technology
University of Canberra

05/2025

Capstone Project – Crypto Price Prediction using LSTM & ARIMA
Web Debugging: Browser DevTools, UI/UX optimization, and visual troubleshooting.

University of Canberra | 2024 | github.com/ChaiThere/CapstoneProject2025

- Developed a hybrid ML pipeline for time series forecasting
- Utilized Python, Google Trends, and VADER for sentiment analysis
- Deployed project to GitHub with documentation and live demos

Portfolio Website (React.js, Tailwind CSS)

Personal | Ongoing | sahilstha.vercel.app

- Created a responsive, accessible portfolio site to showcase projects
- Focused on clean UI/UX with attention to usability and mobile compatibility

Support Flow

Personal | Personal | supportflo.vercel.app

- Full stack customer support ticketing system featuring real-time notifications, AI-powered responses, and comprehensive analytics (Made with Anti-Gravity) .

Experience

Digital Engineer Intern Cre8ive - C8 Digital

07/2026 to Current
Canberra, ACT

- Created a functional webform allowing users to submit their details for an event.
- Fixed styling issues and visual misalignments on an ongoing website build using browser developer tools.
- Designed and built a website using Webflow, translating an initial design from Canva into a functional site.
- Replicated a page and its associated sub-content, successfully migrating it from a staging environment to a live website.

Sales Consultant and Customer Service Telstra

02/2026 to Current
Woden, ACT

- Advise customers on mobile, broadband, and technology plans and devices, matching solutions to their needs and budget.
- Utilize Salesforce for incident management and service request tracking, ensuring high-quality documentation for technical escalations
- Provide responsive technical support for mobile and broadband systems, diagnosing and resolving complex connectivity and device configuration issues.
- Maintain high-quality handover and escalation notes for specialist technical teams, reducing resolution times for complex service inquiries.

Team Leader Canberra Southern Cross Club

08/2022 to Current
Phillip, ACT

- Led team in delivering high-quality service to club members and guests.
- Managed the team to ensure seamless service and efficient operations during shifts.
- Provided practical ICT support and troubleshooting for POS terminals, printers, and network connectivity; restored service, and escalated issues when required.
- Operated POS and bar inventory systems to ensure accurate transaction processing and stock levels.
- Trained new staff in service standards, best practices, and cash-handling procedures.
